DUPLEX TRANSMISSION SYSTEM AND METHOD INCLUDING HYBRID CIRCUIT AND NEAR-ECHO SUPPRESSION

Abstract of the Disclosure

reduce near echo signals. The circuit includes a balanced 2-wire to 4-wire hybrid for interconnecting a two wire receive path and a two wire transmit path to a two wire transmission line. The two wire receive path connects the balanced hybrid to an A/D converter and the two wire transmit path connects a D/A converter to the balanced hybrid. The two wire receive path contains a filter, dimensioned to remove signals transmitted from the D/A converter. The invention is particularly adapted for use with FDD and OFDD.
